George Philbert: (1) Gasoline Motor belt driven 115 Volt AC Generator
on a 2 wheeled Car Model #310P Serial #12966MS rated at 115 Volts 17.5
Amps Continuous Duty

Gasoline Motor "Wico" (Could not read the
nameplate). Note: The Governor on the Motor is not working and so the
Generator delivers about 150 Volts at no load. When it is loaded the
voltage drops rapidly to about 80 Volts. It cannot be used in it's
present condition.
